*An excerpt from our man in New Delhi , ~~ I believe it would be fair to say Bill is having his share of frustrations*

*"The Metro is again in the news this week when a large hole opened up adjacent to the overhead Metro the two motorcyclists who hit it escaped with minor cuts and scratches. Then the accusations started - the Roading contractor blames the metro who after the recent mishaps are the whipping boys, the Metro blame the council and so it goes on. They did fill it in (7m deep) with concrete and opened the road immediately then wondered why it had sunk a few inches within hours! The Metro came into my reckoning last week as well. I had been told some months ago that the underground portion of the Metro went under the Nehru Stadium so I asked my Tunneling friend who assured me that it didn't. That made me feel better until next day I located a ground site plan of my Bowling greens and guess what - the Metro does not go under*

*the Stadium BUT it does go directly below two of my Greens right next door to the Stadium. Why am I getting a sinking feeling.....”  
Keep smiling Bill we are with you*

*“Agony Aunt “*

*Dear John*

*I hope you can help me. The other day, I set off for work leaving my husband in the house watching TV.*

*My car started stalling and then it broke down about a mile down the road and I had to walk back to get my husband's help.*

*When I got home, I couldn't believe my eyes. He was in our bedroom with the neighbour's daughter!*

*I am 32, my husband is 34, and the neighbour's daughter is 19. We have been married for ten years. When I confronted him, he broke down and admitted that they had been having an affair for the past six months. He won't go to counselling and I'm afraid I am a wreck and need advice urgently. Can you please help?*

*Sincerely, Sheila*

*Dear Sheila:*

*A car stalling after being driven a short distance can be caused by a variety of faults with the engine.*

*Start by checking that there is no debris in the fuel line. If it is clear, check the vacuum pipes and hoses on the intake manifold and also check all grounding wires. If none of these approaches solves the problem, it could be that the fuel pump itself is faulty, causing low delivery pressure to the injectors.*

*I hope this helps,*

*John*

*“Be careful out there”*

*Cheers for now*
